

RRS-3 Apparatus-Specific Portable Remote Racking Systems

CBS ArcSafe Apparatus-Specific Remote Racking Systems (RRS-3) are designed to remotely rack a single style of circuit breaker utilizing a portable, stand-alone device. The RRS-3 units are most commonly assisted by strong magnets, meaning that no modifications are required to the switchgear. This also allows operators to easily move the RRS-3 from one breaker to another.

The RRS-3 system is an inexpensive single-apparatus remote racking system that allows the operator to install and remove a breaker while standing 25 to 75 feet away with a hand-control unit. Each CBS ArcSafe RRS-3 is custom built to your electrical equipment so that it can safely operate your switchgear.

RRS-3 MBII

RRS-3 GMI & RSO-IV-M18 Operator

RRS-3 VCPR

BENEFITS

- Lightweight, portable construction
- Mechanical and electrical safety protection
- Mechanical clutch over-racking protection
- Adjustable to fit unique equipment configurations
- Fast and easy to set up
- Reduced need for a full-body arc-flash suit
- Adds safety and helps comply with NFPA 70E
- No modifications required

Remote Switch Operators (RSO)

RSO-IIID-M18

1. Operating pushbuttons, such as circuit breaker trip and close buttons
2. Operating charging handles requiring single or multiple cycles
3. Engaging or disengaging mechanical interlocks, such as circuit breaker interlock foot-pedals

UPDATED DESIGN

POWERED BY
M18 REDLITHIUM

RSO-IAR-M18

1. Operating pushbuttons, such as circuit breaker trip and close buttons
2. Operating levers, such as those found on motor control center buckets
3. Operating handles requiring single strokes
4. Operating rotary and pistol-grip switches, such as breaker control switches

RSO-IV-M18

1. Works with RRS-3 Apparatus-Specific Remote Racking Systems
2. Installing and removing any switchgear utilizing a rotary racking mechanism
3. Installing and removing any switchgear utilizing a non-rotary racking mechanism
4. Engaging or disengaging mechanical or electrical interlocks, such as circuit breaker interlock foot-pedals or buttons
5. NEW - Blue Indicator beacon alerts user when input settings have been reached
